Experience

OKTZ TI   June/2024 – PRESENT
FullStack Developer PL   *Belo Horizonte*

- Development and maintenance of the CoopStore/Payprint platform.
- Integration and support for various franchises, such as OdontoPrev, Oral Company, and others, ensuring proper system functionality.
- Collaboration with different squads, contributing to multiple projects within the company.

Grupo Bamaq   May/2022 – June/2024 ($\sim$ **2 years 2 months**)
FullStack Developer - PHP   *Contagem*

- Hired to develop a credit letter e-commerce platform, from conception to implementation.
- Lead developer on a project in partnership with Uber and Bamaq Consórcio, creating an e-commerce platform for partner drivers within the Uber App.
- Developed and maintained the consórcio app, available on the Play Store and App Store, ensuring continuous functionality and improvement.

Distribuidora Gama   August/2021 – May/2022 ($\sim$ **10 months**)
Systems Developer   *Betim*

- My first experience as a developer was creating GamaSoft, a robust software to manage all company systems.
- Developed GamaSoft using technologies such as PHP, Laravel, jQuery, Vue.js, and MySQL.
- Contributed to the creation of integrated and optimized solutions tailored to business needs.

Distribuidora Gama   September/2020 – August/2021 ($\sim$ **1 year**)
IT Support Technician   *Betim*

- Provided technical support, diagnosing and resolving hardware, software, and network issues.
- Assisted in system maintenance and configuration, ensuring stability and security.
- User support, training, and guidance for optimal use of technological resources.

Projects

Projects at OKTZ TI — *Php/Laravel/OpenCart/Jquery/JavaScript/Sql/HTML*   **2024/2025**

- Arte Legal: A platform under development that will connect designers and printing companies, streamlining communication and workflow.
- CoopStore/Payprint: E-commerce platform developed for franchises such as OdontoPrev and Oral Company, using PHP (OpenCart), Laravel, Jquery, and MySQL.
- Zapex: Logistics company with proprietary software developed using Laravel and Blade, ensuring efficient logistics management.
